Installation Instructions 2334 Bracket Kit

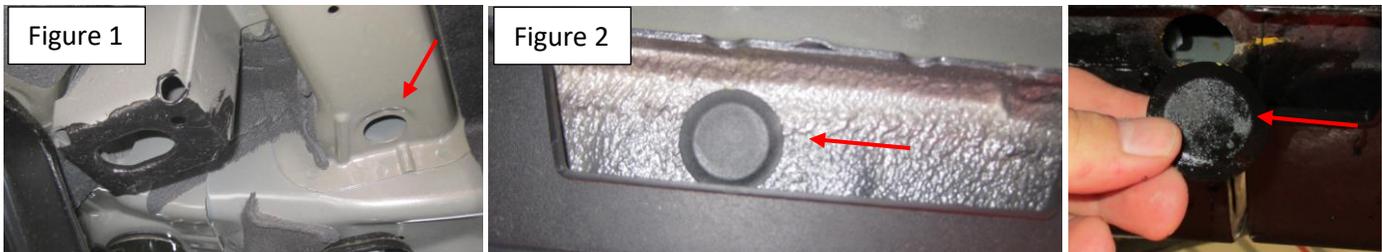

NOTE: This product does not fit Plug-In Hybrid models.

Important Install Tip: When installing Romik HTC inserts follow the sequence below. Make sure the HTC is seated correctly and do not use power tools as this will only spin the insert and possibly damage it. Test by tugging on it before installing bracket. Blue loctite is highly recommended on all metal parts.

NOTE: Middle bracket requires undercarriage panel trimming please see step 4.

Step 1: Locate front mounting locations and hardware as per 1st page of this installation manual. Remove factory rubber plug as shown on Figure 2. Pre-assemble front bracket. NOTE Hyundai models support #2 Driver, #7 passenger assemble as shown on page 1. Kia Sportage models assemble as shown below Figure 5.

Step 2: Install HTC 230 on both front mounting positions. Hint: tug on HTC once installed to make sure it is seated correctly. Figure 3

Step 3: Install front bracket as shown on Figure 4 shows Hyundai. Figure 5 shows Kia. Do not tighten.

Installation Instructions 2334 Bracket Kit

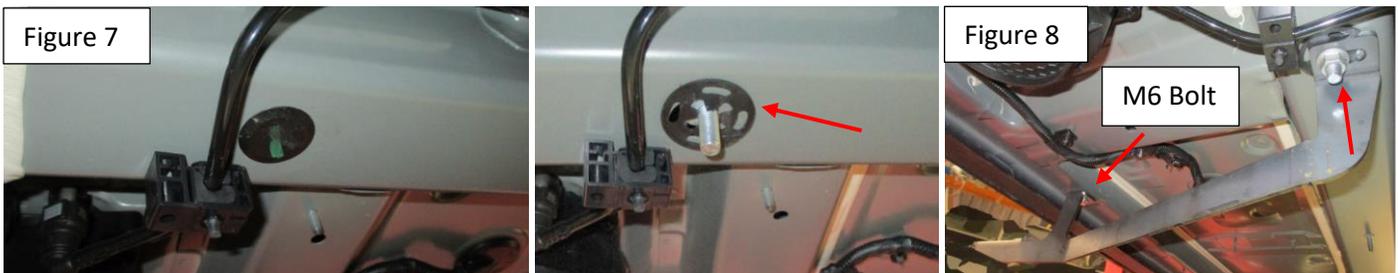

Step 4: Please measure before cutting, Remove factory bolt as shown Figure 6. From this point measure 7.25 inches towards the rear than measure 14.50 inches towards the center of the vehicle. Cut a 2 inch square.

HINT: Mock install middle bracket only using the outer bolt. This will bring you to the proper area to cut.

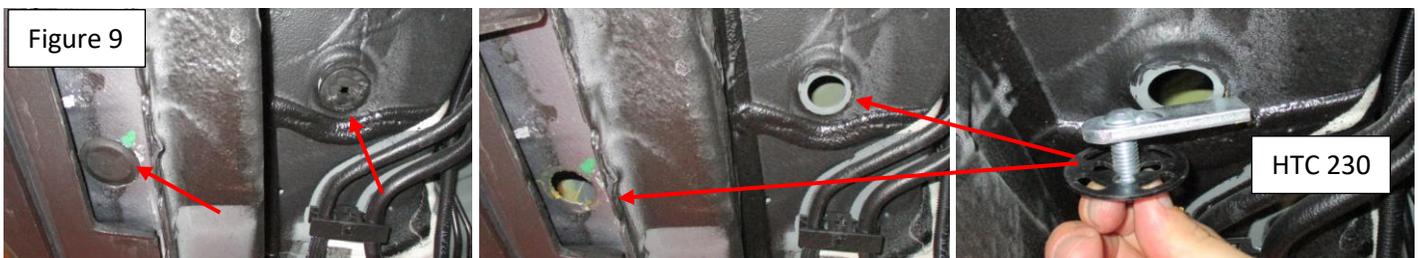

NOTE: For illustration purposes the panel was removed in order to show the mounting points

Step 5: Remove factory rubber plug as shown Figure 7. Install provided HTC 230. Install middle bracket with provided hardware as shown Figure 8. Do not tighten.

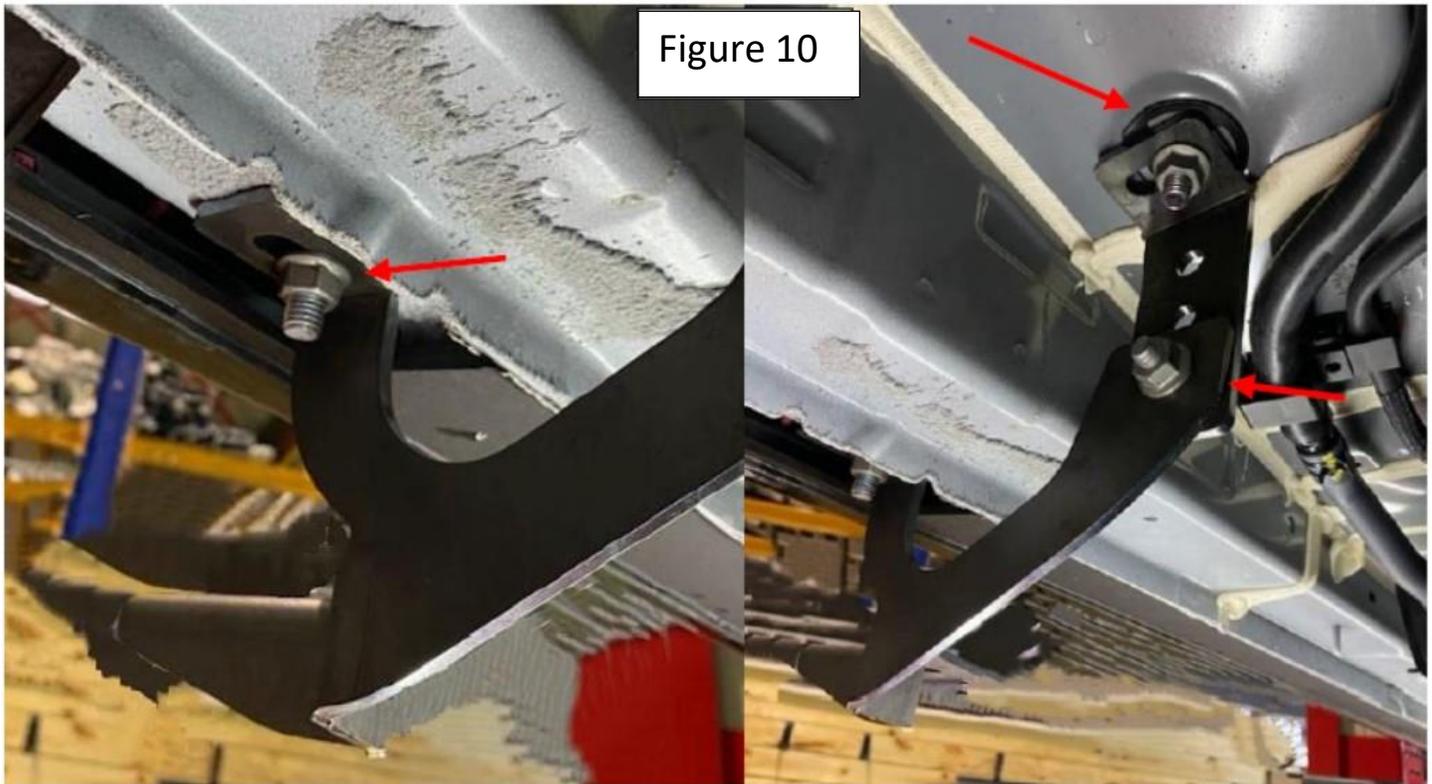

Step 6: Locate rear bracket mounting area and remove factory rubber plugs as shown Figure 9. Install provided HTC 230.

Installation Instructions 2334 Bracket Kit

Step 7: Pre-Assemble rear bracket, Hyundai Santa Cruz uses lower holes on rear support #5 and #10. Tucson and Sportage use middle hole. Install rear bracket as shown on Figure 10. Do not tighten.

Step 8: Repeat steps on opposite side.

Step 9: Proceed to last page of this manual for running board install instructions and torque values

For Technical support please call our team at 1-866-717-6645 and one of our experts will assist you with this installation

Thank you for choosing Romik.

Installation Instructions Running Boards

NOTE: Use of power tools will damage the bottom of the running board and void your warranty.

Step 1: loosen the M8 hardware on back of the running boards.

Step 2: Slide running board onto brackets

Step 3: Tighten hardware to 7 ft lbs.

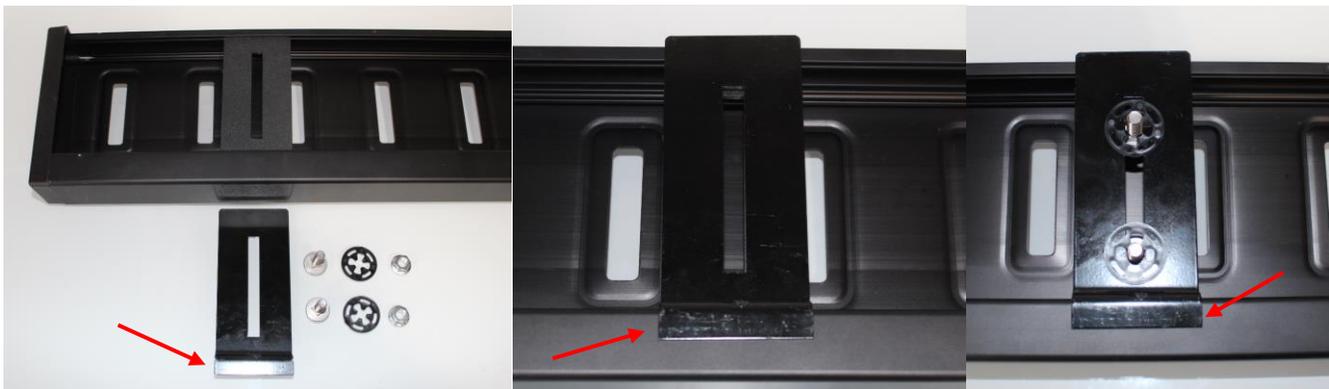

ROF/RPD/ROB Running boards

Step 1: Place clamping plate on top of running board as shown below. Make sure clamping plate sits correctly on running board surface.

Step 2: Install carriage bolts and plastic retaining clips as shown below.

Step 3: Install and tighten hardware to 7 ft lbs.

Cleaning and maintaining your Romik Running boards

Cleaning and maintaining your running boards is important, apply a light coat of a quality carnauba wax at least 2X per year. Wash often with mild soap and make sure to remove all soap residue. Many car automatic carwashes use a strong soap, make sure to use enough water to remove all residue.
